

GOVERNMENT SUPPLY

Arwadh supports current operations of various Saudi government agencies including Ministry of Interior, Health, Defense, Water and Electricity, Petroleum and Minerals, and other municipalities. We work together with our agency clients to help them identify problem areas, leverage proprietary technology to create innovative and cost effective solutions built to mission requirements, and provide on-going support including service and spare parts to ensure the longevity of our solutions.

Through our collaborative partnerships and skilled engineering team, Arwadh has become a leading provider of force sustaining solutions including:

Diesel Generators

Beginning on 2002, Arwadh began providing equipment and service for portable generators to the Saudi Royal Air Force. Diesel generator supply has always been a core business for Arwadh and we continue to provide remote site support, bringing power where you need it the most.

Tactical Wheeled Vehicles

We have proven ability to provide parts that keep tactical vehicles operating. We streamline the purchasing process and manage hundreds of suppliers to keep tanks, trucks, and bulldozers rolling. In addition, we are proud of our forecasting and inventory management capabilities that give the end user complete visibility throughout the ordering process so we can get parts to you fast and efficiently.

Mobile Medical Units

Access to a medical facility while in the field can be crucial to sustaining your operations. Arwadh brings a sterile medical environment directly to the end user no matter where you are located. These units are rapidly deployable, easily configured to your requirements, and when assembled offer a surgery grade environment that meets the highest standards of cleanliness, allowing for surgery and other medical applications in some of the worlds harshest environments.

Hospital Equipment

Arwadh understands the importance of keeping medical equipment sterile and provides equipment that not only disinfects surgical devices and instruments, but stores them in a clean environment. Offerings include cart washers, surgical device disinfection, and clean tables and cabinetry.
